Declassified in Part - Sanitized Copy Approved for Release 2012/10/24 : CIA-RDP79B00873A001800020038-3

1.0 Purpose: The Objective of this study is to evaluate the Interpretability Characteristics to determine the information content of broadband Electro Optical imagery which contains spectral information from 0.4 to 1.1 micron.

2.0 [redacted]:

Description of Problem:

New Imagery acquisition systems are being developed which will create imagery using energy in the Visible [redacted] portion of the Electromagnetic Spectrum. [redacted]. Sponsors experience in interpreting imagery in this combined spectral region is completely lacking. The advantages and disadvantages of the [redacted] with the Visible in one image and STAT whether it should be used in lieu of or in conjunction with the visible portion must be determined.

3.0 Requirement:

Declassified in Part - Sanitized Copy Approved for Release 2012/10/24 : CIA-RDP79B00873A001800020038-3

Declassified in Part - Sanitized Copy Approved for Release 2012/10/24 : CIA-RDP79B00873A001800020038-3

the resolution capability.
